Dear Sirs or Mesdames,

I had the pleasure to work closely with Rok Gruden from February 2018 when I was officially appointed to be his mentor. Rok came from the IT area and just joined the business team, and to my big surprise like a sponge with ease was taking all the information. Return on investment came within the next months where Rok stood firm and help us to build a bridge between the business and IT world. He has a rare ability to understand both sides - their needs and specifics. During the next 2 years together we successfully accomplished multiple internal and external projects related to Contact Centers, business intelligence operations, Telemarketing, data service office, and much more where Rok was surely a strong contributor towards its success. In three words I can describe Rok as an intelligent, loyal, and open-minded young talent.

With my full confidence, I recommend Rok for AmCham Young Professionals contest 2021 and I wish him to reveal all his existing and hidden talents during the project.

Yours very truly,

Jevgenij Martišonok
